Hi Jo – Anne

I would like to offer my support for Richmond Loh's application to attend the Cornell University Aquavet course. I myself attended a Recirculating Systems course at Cornell University and gained significantly from this.

In our state we have a small though growing aquaculture industry. Richmond is one of the few vets we can call on who has the knowledge required to diagnose and prescribe for the species of fish we hold.

The increased knowledge and skills that Richmond would gain from the Aquavet course would be of great benefit to our industry.

Bruce Ginbey
