Dear Dr Ruscoe,

At OFAA, our principles are towards a humane, responsible and sustainable industry.

The OFAA considers itself very fortunate to have a veterinarian with an interest in the ornamental fish industry.

Dr Loh has been actively participating in forums such as the ornamental fish magazines, applying scientific reasoning behind what would otherwise be, debatable topics. His work with aquatic animal health is wide ranging and his name frequently surfaces on internet searches on subjects relating to aquatic animal health.

We highly recommend Dr Loh for the scholarship.

Kind Regards

Chris Rout
OFAA
